FCC STATEMENT

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

(Class A)

Supplier's Declaration of Conformity 47 CFR § 2.1077 Compliance Information

Unique Identifier

Type of Equipment: AV over IP Model Name: NJR-P01UF-T, NJR-P01UF-R, NJR-P01UC-T, NJR-P01UC-R **Responsible Party – U.S. Contact Information**

Company Name: IDK America Inc.

Address: 72 Grays Bridge Road Suite 1-C, Brookfield, CT 06804

Telephone number: +1-203-204-2445

URL: www.idkav.com

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

(FCC SDoC)

CE MARKING

This equipment complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

WEEE MARKING

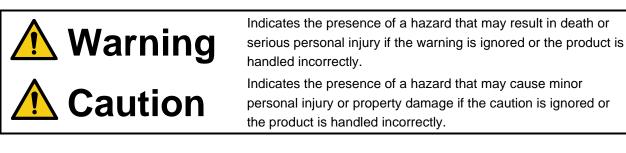

Waste Electrical and Electronic Equipment (WEEE), Directive 2002/96/EC (This directive is only valid in the EU.)

This equipment complies with the WEEE Directive (2002/96/EC) marking requirement. The left marking indicates that you must not discard this electrical/electronic equipment in domestic household waste.

Safety Instructions

Read all safety and operating instructions before using this product. Follow instructions and heed warnings/cautions.

Instructions and warnings/cautions for all products are provided. Some of them may not be applicable to your product.

Symbol	Description	Example	
Caution	This symbol is intended to alert the user. (Warning and caution)	Hot surfaces Caution	
Prohibited	This symbol is intended to prohibit the user from specified actions.		
Instruction	This symbol is intended to instruct the user.	Unplug	

For lifting heavy products:

• Lifting must be done by two or more personnel.

To avoid injury: When lifting the product, bend your knees, keep your back straight and get close to it with two or more persons.

For installing and connecting products:

	Do not place the product in unstable place.
\bigcirc	Install the product in a horizontal and stable place, as this may fall or tip over and cause injury.
	 Secure the product if installing in the locations with vibration.
Prohibited	Vibration may move or tip over the product unexpectedly, resulting in injury.

	 Installation work must be performed by professionals.
	The product is intended to be installed by skilled technicians. For installation, please contact a system integrator or
	IDK. Improper installation may lead to the risk of fire, electric shock, injury, or property damage.
	 Insert the power plug into an outlet that is unobstructed.
	Unobstructed access to the plug enables unplugging the product in case of any extraordinary failure, abnormal
	situation or for easy disconnection during extended periods of non-use.
	 Insert the power plug into an appropriate outlet completely.
	If the plug is partially inserted, arching may cause the connection to overheat, increasing the risk of electric shock or
	fire. Do not use a damaged plug or connect to a loose outlet.
Instruction	 Unplug the product from an AC power source during installation or service.
	When connecting peripheral devices to this product, unplug all involved devices from outlets. Ground potential
	differences may cause fire or other difficulties.
	 The product must be electrically earthed/grounded.
	To reduce the risk of electric shock, ensure the product is connected to a mains socket outlet with a protective
	earthing connection.
	 For PoE/PoH, use category cables meeting IEEE802.3af/at.
	Otherwise, it may cause problems or a fire.

For operating products:

Prohibited	 Keep out any foreign objects. To avoid fire or electric shock, do not permit foreign objects, such as metal and paper, to enter the product from vent holes or other apertures. For power cable/plug and Category cable, Do not scratch, heat, or modify, including splicing or lengthening them. Do not pull, place heavy objects on them, or pinch them. Do not bend, twist, tie or clamp them together forcefully. Misuse of the power cable and plug may cause fire or electric shock. If power cables/plugs become damaged, contact your IDK representative.
Do not disassemble	• Do not repair, modify or disassemble. Since the product includes circuitry that uses potentially lethal, high voltage levels, disassembly by unauthorized personnel may lead to the risk of fire or electric shock. For internal inspection or repair, contact your IDK representative.
Do not touch	• Do not touch the product and connected cables during electric storms. Contact may cause electric shock.
Instruction	• Clean the power plug regularly. If the plug is covered in dust, it may increase the risk of fire.

If the following problem occurs:

	 Unplug immediately if the product smokes, makes unusual noise, or produces a burning odor. Unplug immediately if the product is damaged by falling or having been dropped. Unplug immediately if water or other objects are directed inside.
Unplug	If you continue to use the product under these conditions, it may increase the risk of electric shock or fire. For
	maintenance and repair, contact your IDK representative.

For installing	g and connecting products:
Prohibited	 Do not place the product in a location where it will be subjected to high temperatures. If the product is subjected to direct sunlight or high temperatures while under operation, it may affect the product's performance and reliability and may increase the risk of fire. Do not store or operate the product in dusty, oil smoke filled, or humid place. Placing the product in such environment may increase the risk of fire or electric shock. Do not block the vent holes. If ventilation slots are blocked, it may cause the product to overheat, affecting performance and reliability and may increase the risk of fire. Do not place or stack heavy items on the product. Failure to observe this precaution may result in damage to the product itself as well as other property and may lead to the risk of personal injury. Do not exceed ratings of outlet and wiring devices. Exceeding the rating of an outlet may increase the risk of fire and electric shock.
No wet hands	• Do not handle power plug with wet hands. Failure to observe this precaution may increase the risk of electric shock.
Instruction	 Use and store the product within the specified temperature/humidity range. If the product is used outside the specified range of temperature and humidity continuously, it may increase the risk of fire or electric shock. Do not place the product at elevations of 1.24 mi. (2,000 m) or higher above sea level. Failure to do so may shorten the life of the internal parts and result in malfunctions. When mounting the product into the rack, provide sufficient cooling space. Mount the product in a rack meeting EIA standards, and maintain spaces above and below for air circulation. For your safety as required, attach an L-shaped bracket in addition to the panel mount bracket kit to improve mechanical stability. Never insert screws without the rubber feet into the threaded holes on the bottom of the product. Never insert screws alone into the threaded holes on the bottom of the product. Never insert screws alone into the threaded holes on the product. Reinstall the originally supplied rubber feet using the originally supplied screws only.

For operating products:

Hot surfaces Caution	For products with the hot surfaces caution label only: • Do not touch the product's hot surface. If the product is installed without enough space, it may cause malfunction of other products. If you touch product's hot surface, it may cause burns.
Prohibited	 Use only the supplied power cable and AC adapter. Do not use the supplied power cable and AC adapter with other products. If non-compliant adapter or power cables are used, it may increase the risk of fire or electric shock.
Unplug	 If the product won't be used for an extended period of time, unplug it. Failure to observe this precaution may increase the risk of fire. Unplug the product before cleaning. To prevent electric shock.
Instruction	 Do not prevent heat release. If cooling fan stops, power off the product and contact IDK. Failure to do so may raise internal temperature and increase the risk of malfunction, fire, or electric shock. Keep vents clear of dust. If the vent holes near the cooling fan or near the fan are covered with dust, internal temperatures increase and may increase the risk of malfunction. Clean the vent holes and near the fan as needed. If dust accumulates inside of the product, it may increase the risk of fire or electric shock. Periodic internal cleaning, especially before humid rainy season, is recommended. For internal cleaning, contact your IDK representative.

About this Guide

This guide describes features, notes, and configurations of the NJR-P HDMI Encoder/Decoder.

Conventions

- The following symbols are used in this guide.
 - [] : Setting values displayed on the front panel and WEB GUI
 - " : Reference
- The following notifications are used in this guide.

Note : Addresses practices not related to personal injury, such as restrictions and attention.

About this Product

The NJR-P is an AV over IP solution for high definition signal transmission via fiber optic cables or category cables. This 4K solution leverages 10Gb Ethernet switches and enables signal management of 4K@60 (4:4:4) signals with zero frame latency. USB HID class is also supported for KVM extension application. Additionally, via the NJR-P, the NJR-CTB can be controlled using an IR cable (IR-P01-R) and recommended remote controller. The NJR-P features LAN/RS-232C bidirectional communication.

The NJR-P01UC can be powered from PoE-supported 10GbE switch over a Category cable; this feature eliminates the need for AC adapter.

Use this product with a combination of NJR-P or IP-NINJAR series products.

Setting

The NJR-P can be set using the IP-NINJAR Configurator or NJR-CTB. Set "**Stopping sending device detection packet (P.11)**" to [OFF]. If it is set to [ON], IP-NINJAR Configurator or NJR-CTB is not detected.

The table below is used in this chapter.

Example:

Item	NO INPUT MONITORING			
For	r HDMI IN			
Value	OFF, 2s to 15s (10s) (by 1s)	Default value is shaded.		

DIP switch

[OFF] : Set a DIP switch to the upper position.

[ON] : Set a DIP switch to the down position.

Note

Set DIP switches No.1 and No.4 to [OFF] at all times.

Stopping sending device detection packet

Į			
Ž	2	3	Щ

Item	Stopping sending device detection packet	
Value	DIP switch No.2	
	OFF, ON	

[OFF] : Sends device detection packet.

[ON] : Does not send device detection packet.

The NJR-P automatically sends device detection packet to LAN periodically. To not send unnecessary packet to LAN, set DIP switch No.2 to [ON].

Note

If DIP switch No.2 is set to [ON], the IP-NINJAR Configurator or NJR-CTB cannot detect the NJR-P.

Disabling HDCP or EDID settings

Į			
No	0	J	Щ

Item	Disabling HDCP or EDID settings
For	HDMI OUT, HDMI IN
Value	DIP switch No.3 OFF, ON

- [OFF] : Enables settings of "HDCP authentication (P.17)" and "EDID selection (P.20)".
- [ON] : Disables settings of "HDCP authentication (P.17)" and "EDID selection (P.20)". Settings below will be applied.

HDCP authentication	: HDCP INPUT ONLY
EDID selection	: EXTERNAL EDID

Input

Hot plug output for when there is no active video input signal

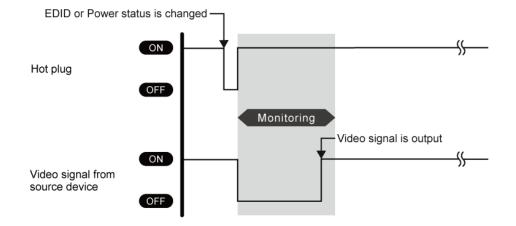

The NJR-P requests the source device to output video signal by sending hot plug when no active video signal is input. You can enable/disable this feature and set the request interval.

Item	NO INPUT MONITORING	
For	HDMI IN	
Value	OFF, 2s to 15s (10s) (by 1s)	
[OFF]	: Does not request the source device to output video signal even if there is no active input	
	signal.	

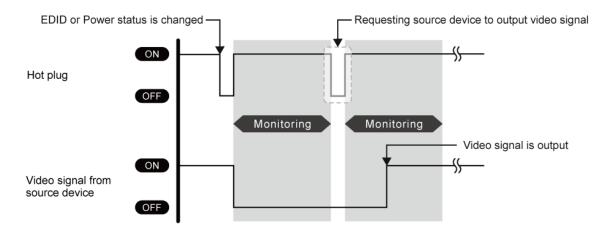

[2s] to [15s] : Requests the source device to output video signal after the specified monitoring time if there is no active input signal.

If the NJR-P is powered on or EDID is changed with the connected source device is powered on, the source device may stop outputting video signal. In this case, use this feature to request the source device to output video signal.

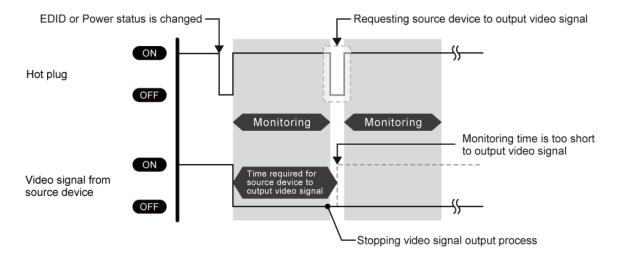

Example: Video signal is output within the specified monitoring time

Example: The source device stops outputting video signals \rightarrow Hot plug request is needed.

Example: The specified monitoring time is too short. \rightarrow Set the longer monitoring time.

If the interval is shorter than the time for source device output video signal, the source device repeats the video output process and does not output video signal. This problem can be solved by setting longer monitoring time.

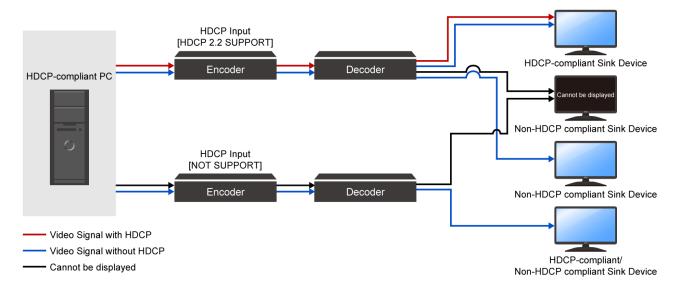

Note

If the source device, such as a PC, disables the monitor power-saving or dual monitor features, set this setting to [OFF].

HDCP input

Item	HDCP INPUT		
For	HDMI IN		
Value	HDCP 2.2 SUPPORT, HDCP 1.4 SUPPORT, NOT SUPPORT		
[HDCP 2.2 SUPPORT] : Operates as an HDCP 2.2 supported device.			
[HDCP 1.4 SUPPORT] : Operates as an HDCP 1.4 supported device.			
[NOT SUPPOF	RT] : Operates as a non-HDCP compliant device		

Some source devices negotiate with the connected device to determine if HDCP encryption is supported. After this negotiation, the source device determines whether HDCP signal encryption is enforced or not. This process takes place with some source device, even if the content being presented is not copyright protected. The NJR-P is HDCP compliant, if it is connected to a display device that does not support HDCP, unprotected AV content may not be successfully displayed. Under these circumstances and if the content is indeed not protected, the problem can be solved by setting this menu to [NOT SUPPORT].

Note

HDCP 2.2 Type 0 video can be displayed on sink devices supporting HDCP 1.4.

HDCP 2.2 Type 1 video can be displayed on sink devices supporting HDCP 2.2 but cannot be displayed on sink devices supporting HDCP 1.4.

Output

Signal format

Item	SIGNAL FORMAT		
For	HDMI OUT, SDVoE OUT		
Value	AUTO, YCbCr 4:4:4, YCbCr 4:2:2, YCbCr 4:2:0, RGB, DVI		
[AUTO]	: Outputs video signals at the optimal color space of the connected device.		
[YCbCr 4:4:4]	: HDMI YCbCr 4:4:4 has the highest priority.		
[YCbCr 4:2:2]	[YCbCr 4:2:2] : HDMI YCbCr 4:2:2 has the highest priority.		
[YCbCr 4:2:0]	: YCbCr 4:2:0 has the highest priority.		
	Enabled only if input signal resolution is set to 4K@50/59.94/60. If the input signal resolution		
	is 4K@30 or lower or if the sink device does not support HDMI YCbCr 4:2:0, [AUTO] is		
	applied.		
[RGB]	: HDMI RGB has the highest priority.		
[DVI]	: Enabled only for resolutions 4K@30 or lower.		

Note

If DVI signal is output, digital audio is not output.

Switching mode

You can set the video signal output from the HDMI output connector.

Item	SWITCHING MODE		
For	HDMI OUT		
Value	STANDARD, FAST & SCALE		
[STANDARD] : Transmission delay is about 120 µs. If no video signal is input from a decoder, no vide			
	signal is output from the HDMI output connector. If video signal of the same encoder is		
	output to multiple decoders, all output video signals are synchronized.		
[FAST & SCALE]: Transmission delay is two frames or less. The video signal of the set in "Output			
	resolution (P.17)" is always output from the HDMI output connector. The input video		
	signal switching via network can be performed without noise.		

Output resolution

You can set the output video resolution for when "Switching mode (P.16)" is set to [FAST & SCALE].

Item	RESOLUTION			
For	HDMI OUT			
Value	4096x2160 60Hz	1080p 60Hz	2560x1600	(WQXGA)
	4096x2160 50Hz	1080p 59.94Hz	2560x1440	(WQHD)
	4096x2160 30Hz	1080p 50Hz	2048x1152	(QWXGA)
	4096x2160 24Hz	720p 60Hz	1920x1200	(WUXGA)
	3840x2160 60Hz	720p 59.94Hz	1920x1080	(VESAHD)
	3840x2160 50Hz	720p 50Hz	1680x1050	(WSXGA+)
	3840x2160 30Hz		1600x1200	(UXGA)
	3840x2160 24Hz		1600x900	(WXGA++)
			1440x900	(WXGA+)
			1400x1050	(SXGA+)
			1366x768	(WXGA)
			1360x768	(WXGA)
			1280x1024	(SXGA)

[4096x2160]/[3840x2160]/[1080p]/[720p]: Meets CTA-861.

Other resolutions: Meets VESA DMT/VESA CVT.

[2560x1600]/[2560x1440]/[2048x1152]/[1920x1200]/[1920x1080]: Reduced Blanking

HDCP authentication

Item	HDCP AUTHENTICATION		
For	HDMI OUT		
Value	HDCP 2.2, HDCP INPUT ONLY, ALWAYS		
[HDCP 2.2]	HDCP 2.2] : HDCP 2.2 authentication		
[HDCP INPUT	ONLY] : HDCP 2.2 or HDCP 1.4 authentication depending on the sink device		
	Outputs signal depending on HDCP presence of input signal.		
	If input signal is protected by HDCP, outputs signal with HDCP.		
	If input signal is not protected by HDCP, outputs signal without HDCP.		
[ALWAYS]	: HDCP 2.2 or HDCP 1.4 authentication depending on the sink device		

For a sink device that is not supported by HDCP, video is displayed only if this setting is set to a value other than [HDCP 2.2] and input signal is not supported by HDCP.

If [HDCP INPUT ONLY] is set, HDCP presence of output signal changes depending on HDCP presence of input signal. Some sink devices may not be displayed temporarily.

To enable this setting, set "Disabling HDCP or EDID settings (P.12)" of DIP switch No.3 to [OFF].

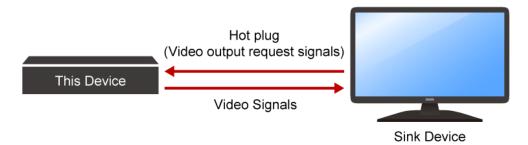

Hot plug ignoring duration

You can set the duration for ignoring video output request signals that are sent from the sink device.

Item	HOTPLUG MASK
For	HDMI OUT
Value	OFF, 2s to 15s
[OFF] : Always receives video output request signals from sink devices.	

[2s] to [15s] : After receiving video output request signals, ignores these signals during the specified period.

If the signal request is repeated in a short cycle, the NJR-P resets the video output process. As a result, video may not be output. This problem can be solved by setting the ignoring duration.

Output audio

Mute

You can mute/unmute the output audio.

Item	MUTE
For	HDMI OUT, SDVoE OUT
Value	ON (Muted), OFF

Audio mute duration

When input audio signal is switched, audio mute is enabled to prevent audio noise. You can set how long the mute status keeps.

For some sink devices, noise occurs after input audio signal is switched. If connecting these sink devices, set this menu.

Item	AUDIO MUTE TIME
For	HDMI OUT
Value	0ms to 5000ms (600ms) (by 1ms)

Output audio selection

You can select the audio (digital or analog input audio) that is output from the HDMI output connector. Analog input audio is available when using IP-NINJAR encoder or transceiver that has analog audio input.

Item	DIGITAL AUDIO
For	HDMI OUT
Value	DIGITAL, ANALOG

EDID

EDID can be set using the following data:

A source device that is connected to an HDMI input connector obtains information of supported video and audio signals from the EDID. You can change the information to be sent to a source device.

To enable this setting, set "Disabling HDCP or EDID settings (P.12)" of DIP switch No.3 to [OFF].

EDID selection

You can set the EDID that will be sent to source device.

Item	EDID SELECTION						
For	IDMI IN						
Value	BUILT-IN EDID, EXTERNAL EDID, COPY DATA						
BUILT-IN EDI	BUILT-IN EDID] : Uses built-in EDID. You can change the following EDID information:						
	[Resolution (P.21)]						
	[Deep Color (P.22)]						
	【Audio format (P.22)】						
	[Speaker configuration (P.23)]						
[EXTERNAL E	DID] : Receives the EDID of sink device that is connected to the decoder of the SDVoE						
	output.						
	If EDID reading fails, the EDID is not changed.						
[COPY EDID]	COPY EDID] : Uses EDID that is saved to the NJR-P in " Copying EDID (P.21) ".						

Note

If HDR signal is used, set this menu to [EXTERNAL EDID] or copy EDID of the sink device supporting HDR signals and set this menu to [COPY DATA].

Resolution

You can set the resolution of the NJR-P for if "EDID selection (P.20)" is set to [BUILT-IN EDID].

Item	RESOLUTION	
For	HDMI IN	
Value	See the table below.	3840x2160@60Hz 4:4:4

Y: Supported, P: Only YCbCr 4:2:0, N: Not supported

Timing of [720p]/[1080i]/[1080p]/[3840x2160]/[4096x2160] meets the CTA-861 standard. For other resolutions, timing parameters meet the VESA DMT or VESA CVT standard.

Copying EDID

EDID of sink device is read and saved to the NJR-P.

Item	EDID COPY
For	-
Value	_

Deep Color

You can set the color depth of the NJR-P for if "EDID selection (P.20)" is set to [BUILT-IN EDID].

Item	DEEP COLOR
For	HDMI IN
Value	24-BIT COLOR, 30-BIT COLOR, 36 BIT COLOR

If selecting a value other than [24-BIT COLOR] and the source device output video at 30 bit or higher, it may cause noise on the video or signal may not be transmitted. In such a case, the problem may be solved by setting the color to [24-BIT COLOR].

Audio format

You can set the audio format and maximum sampling frequency of the NJR-P for if "EDID selection (P.20)" is set to [BUILT-IN EDID].

Item	AUDIO FORMAT
For	HDMI IN
Value	PCM : 32kHz, 44.1kHz, 48kHz, 88.2kHz, 96kHz, 176.4kHz, 192kHz
	Dolby Digital : OFF, 32kHz, 44.1kHz, 48kHz
	AAC : OFF, 32kHz, 44.1kHz, 48kHz, 88.2kHz, 96 kHz
	Dolby Digital+ : OFF, 32kHz, 44.1kHz, 48kHz
	DTS : OFF, 32kHz, 44.1kHz, 48kHz, 96kHz
	DTS-HD : OFF, 44.1kHz, 48kHz, 88.2kHz, 96kHz, 176.4kHz, 192kHz
	Dolby TrueHD: OFF, 44.1kHz, 48kHz, 88.2kHz, 96kHz, 176.4kHz, 192kHz

Note

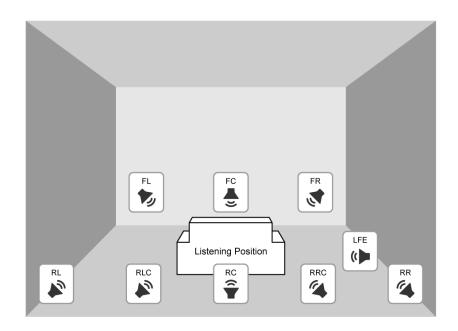

Some LC monitors do not support some audio formats. Select an supported audio format and sampling frequency.

Speaker configuration

You can set the NJR-P's speaker configuration of multi-channel audio for if "EDID selection (P.20)" is set to [BUILT-IN EDID].

Item	SPEAKER CONFIGRATION	
For	HDMI IN	
	Number of speakers	Number of speakers
Item	1 to 8 (2)	See the table below.
		ON, OFF*
		*Only FL/FR: ON

Number of speakers	FL/ FR	LFE	FC	RL/ RR	RC	RLC/ RRC

4	ON	ON	ON	OFF	OFF	OFF
5	ON	ON	OFF	ON	OFF	OFF
6	ON	ON	ON	ON	OFF	OFF
7	ON	ON	ON	ON	ON	OFF
8	ON	ON	ON	ON	OFF	ON

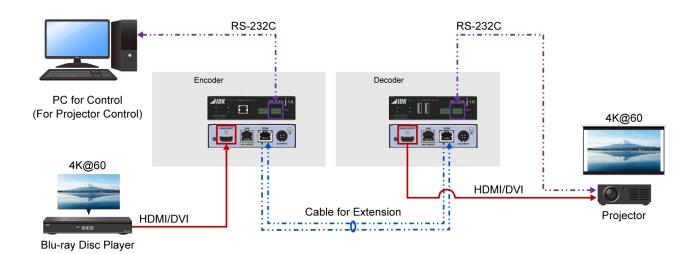

FL	Front Left
FC	Front Center
FR	Front Right
RL	Rear Left
RC	Rear Center

RR	Rear Right
RLC	Rear Left Center
RRC	Rear Right Center
LFE	Low Frequency Effect

RS-232C

The received data from the RS-232C connector can be transmitted to the RS-232C via the cable for extension.

Communication setting

Item	PARAMETERS							
For	Baud rate [bps]	aud rate [bps] Data bit length [bit] Parity check Stop bit [bit]						
Value	4800, <mark>9600</mark> , 19200, 38400, 57600, 115200	7, 8	NONE, ODD, EVEN	1, 2				

LAN

The IP address can be obtained automatically by DHCP (Dynamic Host Configuration Protocol).

Network

Item	IP ADDRESS
Value	0.0.0.0 to 255.255.255.255 (Automatic)
Item	SUBNET MASK
Value	0.0.0.0 to 255.255.255.254 (Automatic)

Item	GATEWAY ADDRESS
Value	0.0.0.0 to 255.255.255 (Automatic)

MAC address

Item	MAC address		
Value	Specific values of the device		

Advanced settings

IR control

You can enable/disable the IR function.

Item	IR RECEIVER		
Value	Enabled, Disabled		

USB mode

You can select the operation mode based on the device that is connected to the USB connector.

Item	USB			
Value	USB LOCAL, USB REMOTE			
[USB LOCAL] : For connecting a host, such as a PC.				
[USB REMOTE] : For connecting HID devices, such as a keyboard and mouse.				

Status

I/O signal status and the NJR-P status can be viewed from the IP-NINJAR Configurator or NJR-CTB.

Output		1 output Digital signal for extension Format: IP-NINJAR protocol RS-232C/LAN/USB Connector: 2 LC	1 output HDMI/DVI 1.0 TMDS single link HDCP 1.4/2.2 HDR (*1) x.v.Color/3D/ARC/HEC/CEC are not supported. Connector: 1 female HDMI Type A (19-pin) Use 16 ft. (5 m) or shorter HDMI cables.		
Format		VGA / SVGA / XGA / WXGA (1280x768) / WXGA (1280x800) / Quad-VGA / SXGA / WXGA (1360x768) / WXGA (1366x768) / SXGA+ / WXGA+ / WXGA++ / UXGA / WSXGA+ / VESAHD / WUXGA / QWXGA / 4K 480i / 480p / 576i / 576p / 720p / 1080i / 1080p / 4K For 4K formats, 24 Hz/25 Hz/30 Hz/50Hz (4:4:4)/60 Hz (4:4:4) are supported.			
Color depth		24 bit, 30 bit, 36 bit Deep Color For 4K formats: only 24 bit			
Dot clock		25 MHz to 600 MHz			
TMDS clock		25 MHz to 300 MHz			
TMDS data rate		0.75 Gbps to 18 Gbps			
Digital audio input		Multi-channel LPCM up to 8 channels Sampling frequency: 32 kHz to 192 kHz Sample size: 16 bit to 24 bit	-		
Digital audio out	put	-	Multi-channel LPCM up to 8 channels Sampling frequency: 32 kHz to 192 kHz Sample size: 16 bit to 24 bit		
Cable	Cable	Duplex fiber cable SFP+ optical transceiver			
for extension	Transmission distances (*2)	Up to 984 ft. (300 m) (OM3 Multimode fiber), Up to 6.21 mi. (10 km) (OS1 Singlemode fiber)			
	RS-232C	1 port/captive screw (3-pin), full duplex, up to 115.2 kbps			
Control	LAN	1 port/RJ-45 10Base-T/100Base-TX/1000Base-T (Auto			
Control	USB	1 port/female Type-B (HID class)	2 ports/female Type-A (HID class)		
	IR input	1 port/captive screw (3-pin)			
Functions		DDC buffer, Connection Reset (*3)			
	AC adapter	Input : 100 - 240 VAC ±10%, 50 Hz/60 Hz ±3 Hz Output : DC 12 V 3 A 36.0 W (A dedicated AC adapter is provided)			
General	Power consumption	About 8 W About 10 W			
	Dimensions	4.2 (W) × 1.1 (H) × 7.1 (D)" (106 (W) × 28 (H) × 180 (D) mm) (Quarter rack wide, thin type) (Excluding connectors and the like)			
	Weight	1.5 lbs. (0.7 kg)			
	Temperature	Operating : 32°F to 104°F (0°C to +40°C) Storage : -4°F to +176°F (-20°C to +80°C)			
	Humidity	Operating/Storage: 20% to 90% (Non Condensing)			
	Turniuity	Operating/Storage: 20% to 90% (Non Condensing)			

*1 HDR is supported if the connected sink device supports HDR and its copied EDID is set for EDID setting.

*2 Only if the SFP+ optical transceiver sold by IDK is used, signals can be transmitted to the mentioned maximum transmission distance. If using other SFP+ optical transceiver, check the compatible fiber and maximum distance of the SFP+ optical transceiver.

*3 For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the NJR-P's output. If other devices are connected between the NJR-P's output and sink device, this feature may be invalid.

Input 1 input 1 input 1 input HDM/DV1-10 Digital signal for extension Format: PNNUAR protocol HDR (*1) RS-322C/LANUSB Format: PNNUAR protocol Color3D/ARC/HEC/CEC are not supported.  *1 HDR is supported if the connected sink device supports HDR and its copied EDID is set for EDID setting.
 *2 The actual maximum transmission distance may be shorter than the stated distance depending on the following conditions: quality and cabling of the Cat6A cable, combination with 10 GbE switch, and installation status of the 10 GbE switch. Video may be disturbed or may not be output even if signals are within the range mentioned above.

*3 For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the NJR-P's output. If other devices are connected between the NJR-P's output and sink device, this feature may be invalid.

Supported video signals

					INPUT	OUTPUT
Signal	Resolution	Frame Rate	Pixel Clock	Color Depth	HDMI	HDMI
		[Hz]	[MHz]	[bits]	10GbE	10GbE

RB: Reduced Blanking *For RGB/YCbCr 4:4:4, only 24 bit is supported.

For best results, please confirm that the source device(s) video output can be configured to match the listed formats above. For questions regarding other input video signals, please contact your IDK representative.

Troubleshooting

This chapter provides recommendations in case difficulties are encountered during NJR-P setup and operation.

In case the NJR-P does not work correctly, please check the following items first.

- · Are the NJR-P and all devices connected to power and powered on?
- · Are signal cables connected correctly?
- · Are there any loose or partially mated connections?
- · Are the interconnecting cables specified correctly to support adequate bandwidth?
- · Are specifications of connected devices matched to each other?
- · Are configuration settings for the connected devices correct?
- · Is there any nearby equipment that may cause electrical noise/RF interference?

Refer to the manuals of connected devices as well, since they may possibly be the cause of the problem.

If the problem persists, please contact us after checking the following items.

- · Does the problem occur at all connectors?
- · Does the problem occur when you connect the devices without connecting the NJR-P?
