## HDMI Transceiver NJR-P01UC-TR

The NJR-P01UC-TR is a transceiver for transmitting and receiving 4K@60 HDMI signals simultaneously over a 10GbE AV over IP network via twisted pair cables. Bidirectional RS-232C communication, LAN, USB (HID) such as KVM can be carried over the same twisted pair cable for extension. Additionally, via the NJR, the NJR-CTB can be controlled using an IR cable (IR-P01-R) and recommended remote controller. The NJR can be powered via PoE-supported 10GbE switch over a twisted pair cable; this feature eliminates the need for AC adapter.

This product can be used in combination with IDK's SDVoE supported products.

#### Specification

| Video/Audio input  Analog audio  HDMI  Analog audio  Video/Audio output  Analog audio  Analog audio | 1 input HDMI/DVI 1.0 TMDS single link, HDCP 1.4/2.2 TMDS clock: Up to 300 MHz, TMDS data rate: Up to 18 Gbps Deep Color/HDR* 640x480@60 to 3840x2160@60 Reduced Blanking 480i, 576i to 3840x2160@24/25/30/50/59.94/60 (4:4:4), 3840x2160@50/59.94/60 (4:2:0), 4096x2160@24/25/30/50/59.94/60 (4:4:4), 4096x2160@50/59.94/60 (4:2:0) Color depth: 24/30/36 bits "For all supported video signals, see the table below. \*1 x.v.Color/3D/ARC/HEC/CEC are not supported.

<sup>22</sup> The maximum specified distances may not be achievable with some device combinations, cabling method, or other manufacturer's cable. For the same reasons, video signal disturbances or interruptions may occur, even if signals are within the specified distance (cable length) parameters.

The maximum cable length varies depending on the connected devices. The specifications have been qualified under following conditions:

· HDMI (1080p@60) : When IDK's 24 AWG cable was used and signal of 1080p@60 24 bits was transmitted.

· HDMI (4K@60) : When IDK's 18 Gbps supported cable was used and signal of 3840x2160@60 24 bits was transmitted.

• 10GbE : When CAT6A (STP) cable is used.

Use Class 2 or LPS.

For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will correct these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the NJR-P's output. Connecting other devices between the NJR-P's outputs and sink devices, may interfere with the operation of this feature.
