

HDMI Distribution Amplifier

VAC-S18U

The VAC-S18U is a 1x8 HDCP 2.2 compliant distribution amplifier for HDMI signals at resolutions up to 4K@60 (4:4:4). OUT1 includes a down converter that enables 4K input video signals to be converted automatically to 1080p if the sink device does not support 4K. It also features audio de-embed function.

Output signal can be set to muted (black screen) or disabled for each channel separately. Input and output signals of VAC-S in the system can be monitored from WEB browser for problem analysis.

Input	■ Specification Item		Description
Dutput	Input		HDMI/DVI 1.0 TMDS single link, HDCP 1.4/2.2 x.v.Color/3D (*1)/HDR (*2)/CEC (Pass-through) ARC/HEC are not supported.
Format	Output		HDMI/DVI 1.0 TMDS single link, HDCP 1.4/2.2 x.v.Color/3D (*1)/HDR (*2)/CEC (Pass-through) ARC/HEC are not supported. Connector: 8 female HDMI Type A (19-pin)
For ak(@50/59.94/60 RGB/YCbCr 4:4:4, 24 bit is supported.	Format		480i / 480p / 576i / 576p / 720p / 1080i / 1080p / 4K
TMDS clock 25 MHz to 300 MHz	Color depth		
TMDS data rate			
Plug & Play DDC2B (can be selected from Built-in EDID, Copied EDID, or EDID of connected monitor) Built-in EDID: The maximum resolution can be selected.

- 3D is supported if external EDID is selected while a 3D-supported sink device is connected for EDID setting or if copied EDID of 3D-supported sink device is selected for EDID
- setting. Input 3D signal is output from all output connectors.

 HDR is supported if external EDID is selected while an HDR-supported sink device is connected for EDID setting or if copied EDID of an HDR-supported sink device is selected
- for EDID setting. Input HDR signal is output from all output connectors.

 The maximum cable distance varies depending on the connected devices and was measured under following conditions:

 - 1080p@60: When IDK's 24 AWG cable was used and signals of 1080p@60 24 bit/pixel (8 bit/component) was input or output.
 4K@60: When IDK's 18 Gbps supported cable was used and signals of 4K@60 24 bit/pixel (8 bit/component) was input or output.

 The maximum cable distance depends on the connected devices. The distance may not be extended with some device combinations, cabling method, or other manufacturer's

cable. Video may be disturbed or may not be output even if signals are within the range mentioned above.

For digital systems, some problems, such as an HDCP authentication error, can often be recovered by physically disconnecting and reconnecting the digital cables. However, the Connection Reset feature will fix these problems automatically without the need to physically plug and unplug the cables. It creates the same condition as if the cable were physically disconnected and reconnected. This feature only works for the VAC-S's output. If other devices are connected between the VAC-S's output and sink device, this feature may be invalid.
